LAMICOLOR®

Premium quality meets world class durability

INTRODUCING OUR DUREZZA RANGE OF PREMIUM KITCHEN AND BATHROOM SURFACES

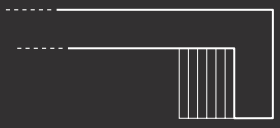
OUR NEW DUREZZA RANGE COMBINES PRACTICALITY AND STRENGTH WITH AN EMOTIONAL AESTHETIC IN AN INNOVATIVE AND BEAUTIFULLY DESIGNED PRODUCT.

Durezza's particular surface composition allows for a scratch resistant, non-porous product that is capable of removing any risk of damage caused by water, chemicals, wines, oils and steam. It's no wonder why these products come with a 15 year warranty!

Available in different thicknesses and finishes from elegant stones with realistic temperature feel, to the design of metals and cements to realistic timbers. Also Durezza boasts larger sheet sizes for better optimisation, adding the ability to provide for designs so far not seen with other decorative finishes.

Versatile surfaces

DUREZZA RANGE OFFERS THREE VARIANTS OF BENCH TOP TYPES, EACH WITH DIFFERENT THICKNESS AND WORKMANSHIP.



TOP A

Scratch resistant, non-porous European quality, reinforced with poplar multilayer. It allows to realize very thick tops (*from 20mm to 160mm*).

TOP D

Scratch resistant, non-porous European quality, with a minimal and essential image. It also allows you to create curved shapes, to design and is ideal for kitchen tops, bathrooms, desk tops and table tops for shops and public places (*10mm thick*).

TOP S

The most recent proposal in the types of plans available. It has the same potential and the same technical requirements as the Top D, but it is characterized by a bevelled terminal cut that emphasizes its elegance (*10mm thick*).

TECHNICAL CHARACTERISTICS ALLOW FOR BUILT-IN, FLUSH-MOUNT AND UNDER-COUNTER APPLIANCES.

100% CERTIFIED SILICA FREE SUSTAINABLE

Our Durezza Range of premium kitchen and bathroom surfaces are 100% silica free and safe to work with. With other products stonemasons may be exposed to crystalline silica dust particularly when using power tools to cut, grind, or polish stone products. The most common stone products with silica are reconstituted stone.
